

How to Pair

(Printer or Blue tooth with the tablet
[Label Smart])

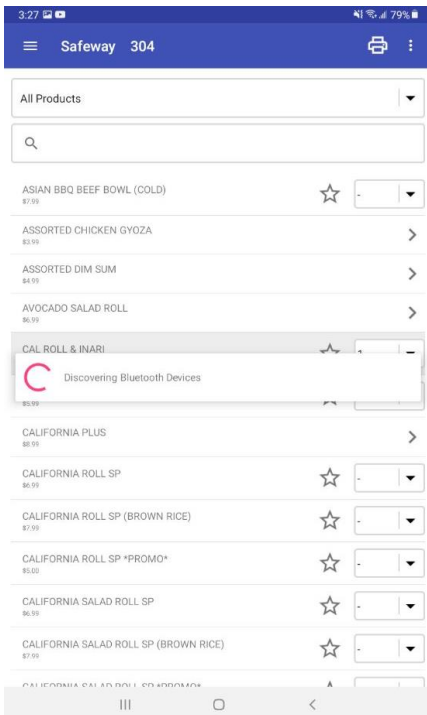

1 On the product list page of the Label Smart (Label Application), click on the icon located on the top left corner and select pair printer option from the list.

10 sec

2 Label application will scan for Bluetooth devices. Wait for the printer serial to pop up on the available device list.

10 sec

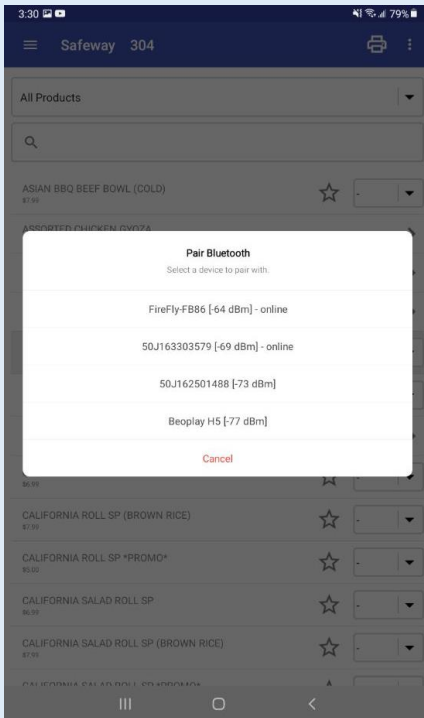

Zebra ZD410 printer friendly name will start with 50J or 50N or just "Zebra". If it is old printer, find Bluetooth name "Bluesnapxxxx" or "Fireflyxxxx".

3

Once the printer or BT serial number is available, please choose it.

10 sec

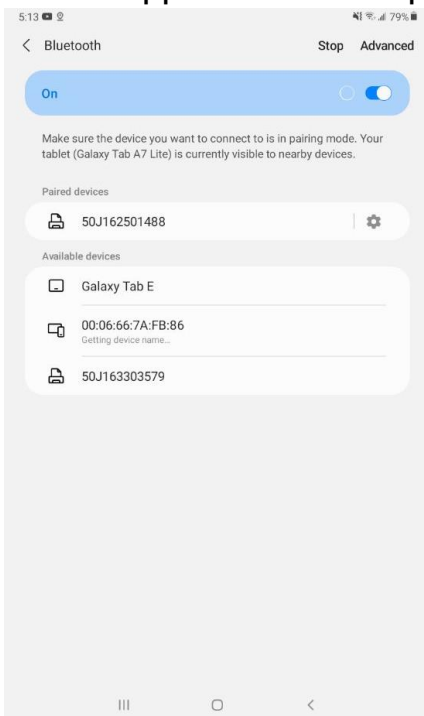

If Bluetooth dongle is asking for PIN, enter "1234". Look for the Bluetooth/Printer pairing confirmation message at the bottom of the screen (the message will pop up and disappear in a couple seconds). You should be able to print now.

4

If Label smart could not find the Bluetooth or printer, please find them in tablet setting > connection > bluetooth and pair them. Then open Label Smart application and repeat the above step.

10 sec

If above steps did not fix the Bluetooth connection issues, please inform AFC label solutions team of your findings in as much detail as possible.
